Symbol description

Warnings

⚠️ **DANGER** indicates a hazardous situation which, if not avoided, will result in death or serious injury.

⚠️ **WARNING** indicates a hazardous situation which, if not avoided, could result in death or serious injury.

⚠️ **CAUTION** indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

**NOTICE** is used to address practices not related to personal injury.

Symbols used

- **Prompt to take action.** This symbol means that you are being prompted to perform some action.

- **Information** and tips to make it even easier to use your ENA.
IMPORTANT SAFEGUARDS

Follow the basic safety precautions

When using electrical appliances, basic safety precautions shall always be followed, to reduce the risk of fire, electric shock, and/or injury to persons, including the following:

- Read all instructions.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against fire, electric shock and injury to persons, do not immerse power cord, plugs, or body of machine in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair or adjustment.
- The use of an accessory attachment not recommended by the appliance manufacturer may result in fire, electric shock, or injury to persons.
- Do not use outdoors.
- Do not let the cord hang over the edge of a table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- To disconnect, turn any control to ‘OFF’ then remove plug from wall outlet.
- Do not use appliance for other than intended use.
- Use extreme caution when dispensing hot steam, hot water or hot coffee.
- For household use only.

SAVE THESE INSTRUCTIONS.
Pass them on to any subsequent user.
**Intended use**

The appliance is designed and intended for household use only. It shall only be used for coffee preparation and to heat milk and water, according to these instructions. Use for any other purpose will be deemed improper. JURA Elektroapparate AG cannot accept any responsibility for the consequences of improper use.

People, including children, who

- do not have the physical, sensory or mental capabilities to use the appliance safely or
- are inexperienced or lack knowledge in how to use the appliance safely

must be supervised by a responsible person when using it, or must be instructed in how to use it correctly.

**Special power cord set instructions**

- The power cord is provided to reduce the risk resulting from becoming entangled in or tripping over a long cord.
- The cord shall be arranged so that it will not drape over the counter top or table top where it can be pulled on by children or tripped over.
- This appliance has a 3-pin grounded plug.
- Do not modify the plug in any way.

Do NOT use extension cords.

If the user chooses to use an extension cord,

- the marked electrical rating of the extension cord shall be at least as great as the electrical rating of the appliance, and
- if the appliance is of the grounded type, the extension cord shall be a grounding type 3-wire cord, and
- the longer cord shall be arranged so that it will not drape over the counter top or tabletop where it can be pulled on by children or tripped over.

**WARNING**

To reduce the risk of fire or electric shock, DO NOT remove any service covers. DO NOT modify the appliance in any way that is not described in these instructions. NO user serviceable parts included. Repair MUST be done by authorized personnel only.

In the event of signs of damage, for example if there is a smell of burning, unplug the machine immediately from outlet and contact JURA customer service.
IMPORTANT SAFEGUARDS

⚠️ CAUTION

This appliance is for household use. Any servicing other than cleaning and user maintenance shall be performed by an authorized service representative:

- Do not immerse base in water or try to disassemble.
- Do not put the appliance or any individual parts in the dishwasher.
- Check voltage to be sure that the voltage indicated on the name plate complies with your voltage. The name plate is located on the underside of the appliance.
- Never use warm or hot water to fill the water container. Use cold water only.
- Keep your hands and the cord away from hot parts of the appliance during operation.

WARNING

- Never clean with scouring powders or hard implements.
- Ensure that the ventilation slots are not covered.
- Never pull out the drip tray during the brewing process. Only pull the drip tray when the display instructs you or when the appliance is ready for use.

NOTICE

- Never fill instant coffee, chocolate mix etc. into the bean container or ground coffee funnel (filler funnel for ground coffee). It will damage the functioning of the brewing chamber.
- Never fill sugar coated coffee beans into the bean container. In case of doubt, call your dealer.
- Never fill anything other than coffee beans into the bean container (no chocolate, no rice, no nuts, no spices, nothing other than roasted coffee beans).
- Never fill frozen beans into the bean container. If you store beans in the freezer, let them thaw 3 to 4 hours before filling them into the bean container.
- Never fill anything but fresh, cold and clean water into the water tank, except when decalcifying.
- Never use mineral or carbonated water. You can use tap water, bottled water, spring water and reverse osmosis water.
- Never do anything with the machine which is not described in these instructions. In case of doubt, call your dealer.

NEVER DO
(or you will void your warranty protection):

- Never fill instant coffee, chocolate mix etc. into the bean container or ground coffee funnel (filler funnel for ground coffee). It will damage the functioning of the brewing chamber.
- Never fill sugar coated coffee beans into the bean container. In case of doubt, call your dealer.
- Never fill anything other than coffee beans into the bean container (no chocolate, no rice, no nuts, no spices, nothing other than roasted coffee beans).
- Never fill frozen beans into the bean container. If you store beans in the freezer, let them thaw 3 to 4 hours before filling them into the bean container.
- Never fill anything but fresh, cold and clean water into the water tank, except when decalcifying.
- Never use mineral or carbonated water. You can use tap water, bottled water, spring water and reverse osmosis water.
- Never do anything with the machine which is not described in these instructions. In case of doubt, call your dealer.

   - Coffee strength ‘strong’
   - Ristretto symbol
   - Espresso symbol
   - Coffee symbol
1 Preparing and using for the first time

This chapter provides you with the information you need to use your ENA without any problems. You will prepare your ENA step-by-step to enjoy your first perfect cup of coffee.

- Visit us on the internet. On the JURA website (www.jura.com) you will find interesting and up-to-date information on your ENA and every aspect of coffee.

Setting up the machine

When setting up your ENA, please note the following:

- Place the machine on a horizontal surface that is not sensitive to water.
- Choose a spot for your ENA which protects the machine against overheating. Ensure that the ventilation slots are not covered.

Filling the bean container

NOTICE

Coffee beans which have been treated with additives (e.g. sugar), ground coffee or freeze-dried coffee will damage the grinder.

- Only use roasted, untreated coffee beans to fill the bean container.
- Remove the aroma preservation cover of the bean container.
- Remove any dirt or foreign objects from inside the bean container.
- Fill the bean container with coffee beans.
- Close the bean container.

First-time use

When using the machine for the first time, you can choose whether you want to operate ENA with or without the CLEARYL Blue filter cartridge. If the water hardness is 10 °dH or more, we recommend using the filter cartridge. If you do not know the hardness of your water, you can find this out first (see Chapter 1 ‘Preparing and using for the first time – Determining the water hardness’).

- The On/Off button also acts as a power switch. When the ENA is switched off, the machine does not consume standby energy.

WARNING

If the machine is operated with a defective power cord, there is a danger of potentially fatal electric shock.

- Never use a machine which is damaged.
- Never use a machine which has a defective power cord.

Precondition: Bean container is filled.

- Insert the power plug into a power socket.
- Press the On/Off button to switch the machine on. The Descaling symbol and the Filter symbol are lit up.

- Now decide whether you want to operate your ENA with or without a CLEARYL Blue filter cartridge.

First-time use with filter cartridge activation

- Touch the Filter symbol. The Water Tank symbol lights up.
- Remove the water tank.
- Open the filter holder.
Insert the filter cartridge into the water tank, exerting slight pressure.

Close the filter holder. It will click into place audibly.

After three months, the filter will cease to work. Set the date on the date plate on the filter holder in the water tank.

Fill the water tank with fresh, cold water and reinsert it.

The Filter symbol lights up.

Touch the Filter symbol.

The symbols flash. The filter is rinsed and the water flows directly into the drip tray.

Rinsing of the filter stops automatically. The machine heats up.

Empty the coffee grounds container and drip tray and rinse with warm water.

Reinsert the coffee grounds container and the drip tray.

The Ristretto, Espresso and Coffee symbols and the symbol for ‘strong’ coffee strength light up. Your ENA is ready for use.

First-time use without filter cartridge activation

If you do not want to use the CLEARYL Blue filter cartridge, you will need to set the water hardness.

The following water hardness settings are available:

<table>
<thead>
<tr>
<th>Water hardness</th>
<th>Symbol(s) shown in display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 1: 1–15 °dH</td>
<td>1 symbol illuminated</td>
</tr>
<tr>
<td>Level 2: 16–23 °dH</td>
<td>2 symbols illuminated</td>
</tr>
<tr>
<td>Level 3: 24–30 °dH</td>
<td>3 symbols illuminated</td>
</tr>
</tbody>
</table>

Touch the Descaling symbol. The symbols light up.

Touch the symbol to set the water hardness, e.g. symbol for ‘level 1’.

Touch the Descaling symbol. The Water Tank symbol lights up.

Place a receptacle under the coffee spout.

Remove the water tank.

Fill the water tank with fresh, cold water and reinsert it.

The symbols flash. The system fills with water and the water flows directly into the drip tray.

The operation stops automatically. The machine heats up.

The symbols flash. The machine is rinsed, water flows out of the coffee spout. The rinse stops automatically.

The Ristretto, Espresso, Coffee and Coffee strength ‘strong’ symbols light up. Your ENA is ready for use.
2 Preparation

Filling the water tank

Daily maintenance of the machine and hygiene when handling coffee and water are key to a perfect coffee result in the cup every time. You should therefore change the water daily.

NOTICE
Milk, sparkling mineral water or other liquids can damage the water tank or the machine.
- Only fill the water tank with fresh, cold water.
- Remove the water tank and rinse with cold water.
- Fill the water tank with fresh, cold water and reinsert it.

Determining the water hardness

You can find out what the water hardness is by using the Aquadur® test strip supplied as standard.
- Hold the test strip briefly (for one second) under running water.
- Shake off the water.
- Wait for about one minute.
- You will then be able to read the degree of water hardness from the discoloration of the Aquadur® test strip and the description on the packaging.

The water hardness can now be set.

2 Preparation

⚠️ WARNING
Hot coffee can cause scalding. Scalding is a serious burn.
- Use extreme care when handling hot liquid.
- Allow liquid to cool down before drinking.
- In the event of scalding, rinse affected area with cold water and seek medical attention.
- Keep children AWAY.

- While a specialty coffee is being prepared, you can stop preparation at any time. Simply touch the symbol for the product in question.
- If preparing two specialty coffees, you have to stop each brewing operation separately.
- Before and during the grinding operation you can select the coffee strength of the ristretto 🍂, espresso ☕️ and coffee ☕️ specialty coffees: ‘normal’ (cadeau), ‘strong’ (cadeau).

The machine always uses the preset amount of water for the type of coffee in question. You can change this setting (see Chapter 2 ‘Preparation – Permanently setting the amount of water for the cup size’).

Your ENA has an Energy Save Mode: Soon after the last preparation, the ENA stops heating up. To indicate that the machine is in energy-saving mode, after about 5 minutes the brightness of all the symbols is reduced. The ENA must heat back up before the next preparation.

Coffee tastes best served hot. A cold porcelain cup cools the beverage – and impairs the taste. We therefore recommend prewarming the cups. The full coffee aroma can develop only in prewarmed cups. You can purchase a JURA cup warmer from your specialized dealer.
Rotating coffee spout

Your ENA has a rotating coffee spout for preparing one or two cups of your desired specialty coffee.

- ‘1 cup’ position

- ‘2 cups’ position

The two coffee spout positions clearly engage.

If the coffee spout is in the ‘2 cups’ position, the desired specialty coffee is prepared twice in succession. The coffee strength can only be set before the first product is prepared.

Ristretto, espresso and coffee

Ristretto ☕️, espresso ☕️ and coffee ☕️ are prepared following this model.

Example: Proceed as follows to prepare one coffee.
Precondition: Your ENA is ready for use.

- Turn the coffee spout to the ‘1 cup’ position.
- Place a cup under the coffee spout.
- Touch the Coffee symbol to start preparation.
  The Coffee ☕️ and Coffee strength (istency) symbols flash, the preset amount of water flows into the cup.
  Preparation stops automatically. Your ENA is once more ready for use.

To prepare two coffees, turn the coffee spout to the ‘2 cups’ position. Press the Coffee symbol ☕️ to start preparation of two cups.

Permanently setting the amount of water for the cup size

It is easy to make permanent settings for the amount of water for all specialty coffees according to the cup size. Adjust the amount once as shown in the following example. Every time you prepare a drink in the future, this amount of water will be dispensed.

The process for adapting the amount of water to the cup size only works when preparing one cup. When two cups are prepared, the set amount is doubled.

Example: Permanently adjust the amount of espresso to the cup size.
Precondition: Your ENA is ready for use.

- Turn the coffee spout to the ‘1 cup’ position.
- Place a cup under the dual spout.
- Touch the Espresso symbol for about 3 seconds until the Ristretto ☕️ and Coffee ☕️ symbols appear again.
2 Preparation

- Release the Espresso symbol.
  The espresso is prepared. The Espresso and Coffee strength symbols ( or ) flash.

- Touch the Espresso symbol as soon as there is enough espresso in the cup.
  Preparation stops. The amount of water for one espresso is permanently stored.
  The Espresso and Coffee strength symbols ( or ) flash until the machine is ready for use again.

- You can alter this setting at any time by repeating the above procedure.

Adjusting the grinder

You can adjust the grinder on a continuous scale to suit the degree of roast of your coffee.

NOTICE
If you adjust the consistency of grind when the grinder is not operating, the grinder adjustment switch could be damaged.

- Only adjust the consistency of grind when the grinder is running.

- For a coarser consistency of grind, turn the switch to the left, for a finer grind, turn it to the right.

The consistency of grind is correct if the coffee flows regularly from the coffee spout. In addition a fine, thick crema forms.

Example: Change the consistency of grind during the preparation of a ‘strong’ espresso.
- Turn the coffee spout to the ‘1 cup’ position.
- Place a cup under the coffee spout.
- Open the cover of the grinder adjustment switch.

- Touch the Coffee strength ‘strong’ symbol.
  The Coffee strength ‘strong’ symbol lights up.

- Touch the Espresso symbol to start preparation.
- Turn the grinder adjustment switch to the desired position while the grinder is running.
  The preset amount of water flows into the cup. Preparation stops automatically.

- Please note that changing the consistency of grind only takes effect for the second coffee preparation.

Ground coffee

You can choose to use a second coffee variety, for example decaffeinated coffee, with the powder chute for ground coffee.

- Use ground coffee which is not ground too finely. Very fine coffee can block up the system so that the coffee only comes out in drips.

- It is not possible to prepare two cups with ground coffee. If the coffee spout is in the ‘2 cups’ position, just one cup is prepared.

- Never add more than one level measuring spoon of ground coffee.

- The desired specialty coffee must be prepared within approximately one minute after filling with the ground coffee. Otherwise the ENA stops the operation and is once more ready for use.
If you did not add a sufficient amount of ground coffee, the ⬇️, ⤪, ⬇️ and ⬇️ symbols flash and the ENA stops the operation.

All specialty coffees with ground coffee are prepared following this model.

Example: Prepare a cup of coffee using ground coffee.

Precondition: Your ENA is ready for use.

- Place a cup under the coffee spout.
- Open the powder chute for ground coffee. The Ground Coffee symbol ⬇️ lights up.
- Place the filler funnel for ground coffee on the powder chute.

- Place one level measuring spoon of ground coffee into the filler funnel.
- Close the powder chute for ground coffee. The ⬇️, ⤪ and ⬇️ symbols flash. The ⬇️ and ⤪ symbols light up.

- Touch the Coffee symbol to start preparation.
  The Coffee symbol ⬇️ flashes, the preset amount of water flows into the cup.
  Preparation stops automatically. Your ENA is once more ready for use.

When the machine is switched on, it is automatically rinsed.
- Place a receptacle under the coffee spout.
- Press the On/Off button to switch the machine on.
  The ⬇️, ⤪ and ⬇️ symbols flash, the machine heats up.
  The machine is rinsed, water flows out of the coffee spout. The rinse stops automatically. Your ENA is ready for use.

### Daily maintenance

To ensure that you get many years of reliable service out of your ENA and to guarantee the optimum coffee quality, the machine requires daily maintenance.

- Remove the drip tray.
- Empty the coffee grounds container and drip tray and rinse with warm water.
- Reinsert the coffee grounds container and the drip tray.
- Rinse the water tank with clean water.
- Wipe the surface of the machine with a clean, soft, damp cloth (e.g. microfiber cloth).

### Switching off the machine

When the ENA is switched off, the system is automatically rinsed if a specialty coffee has been prepared.

- Place a receptacle under the coffee spout.
- Press the On/Off button.
  The ⬇️, ⤪ and ⬇️ symbols flash. The machine is rinsed, water flows out of the coffee spout.
  The rinse stops automatically. Your ENA is switched off.

- When the ENA is switched off with the On/Off button, the machine does not consume standby energy.
- If no action is performed on the machine for 30 minutes, the ENA will automatically switch off to save energy.

### 3 Daily operation

#### Switching on the machine

Daily maintenance of the machine and hygiene when handling coffee and water are key to a perfect coffee result in the cup every time. You should therefore change the water daily.
4 Permanent settings in programming mode

Inserting and activating the filter

Your ENA no longer has to be descaled if you are using the CLEARYL Blue filter cartridge. If you did not activate the filter cartridge the first time you used the machine, you can do this now as follows.

Precondition: Your ENA is ready for use.

- Touch the \( \bullet \) and \( \odot \) symbols for approximately 2 seconds.
  The \( \bullet \), \( \odot \), \( \mathcal{H} \) and \( \mathcal{L} \) symbols light up brightly.

- Touch the Filter symbol for approximately 2 seconds.
  The Water Tank symbol \( \mathcal{H} \) lights up.

- Remove the water tank.
- Open the filter holder.
- Insert the filter cartridge into the water tank, exerting slight pressure.
- Close the filter holder. It will click into place audibly.

- Empty the drip tray and coffee grounds container and reinsert them.
  The Filter symbol \( \mathcal{L} \) lights up.

- Touch the Filter symbol to start rinsing of the filter
  The \( \mathcal{A} \), \( \mathcal{B} \), \( \mathcal{C} \) and \( \mathcal{L} \) symbols flash. The filter is rinsed.
  Rinsing of the filter stops automatically. The Coffee Grounds Container symbol \( \mathcal{P} \) lights up.

- Empty the drip tray and coffee grounds container and reinsert them.
  The \( \mathcal{A} \), \( \mathcal{B} \) and \( \mathcal{C} \) symbols flash, the machine heats up. Your ENA is once more ready for use.

Setting the water hardness

If you are using the CLEARYL Blue filter cartridge and have activated it, there is no need to set the water hardness.

The harder the water is, the more frequently the ENA needs to be descaled. It is therefore important to set the water hardness accurately.

The following water hardness settings are available:

<table>
<thead>
<tr>
<th>Water hardness</th>
<th>Symbol(s) shown in display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 1: 1–15 °dH</td>
<td>1 symbol illuminated ( \mathcal{A} )</td>
</tr>
<tr>
<td>Level 2: 16–23 °dH</td>
<td>2 symbols illuminated ( \mathcal{A} ), ( \mathcal{B} )</td>
</tr>
<tr>
<td>Level 3: 24–30 °dH</td>
<td>3 symbols illuminated ( \mathcal{A} ), ( \mathcal{B} ), ( \mathcal{C} )</td>
</tr>
</tbody>
</table>

Example: Change the water hardness setting from ‘level 2’ (\( \mathcal{A} \), \( \mathcal{B} \)) to ‘level 3’ (\( \mathcal{A} \), \( \mathcal{B} \), \( \mathcal{C} \)).

Precondition: Your ENA is ready for use.

- Touch the \( \bullet \) and \( \odot \) symbols for approximately 2 seconds.
  The \( \bullet \), \( \odot \), \( \mathcal{H} \) and \( \mathcal{L} \) symbols light up brightly.

- Briefly touch the Descaling symbol.
  The \( \mathcal{A} \), \( \mathcal{B} \) and \( \mathcal{C} \) symbols light up.

- Touch the Coffee symbol.
  The \( \mathcal{A} \), \( \mathcal{B} \) and \( \mathcal{C} \) symbols light up.
5 Maintenance

⚠️ WARNING

Use of maintenance products that are harmful to health and discharge of liquids during maintenance program. Harmful if swallowed. Irritating to eyes and skin.

- Keep children AWAY.
- Keep children away from the machine while it is performing a maintenance program.
- Avoid contact with skin and eyes.
- Avoid generation of dust. Do not inhale dust.
- When using do not eat or drink.
- Keep maintenance products away from food, drink and animal food.
- Keep container tightly closed and dry. Keep in a cool place.

Your ENA has the following integrated maintenance programs:
- Cleaning the machine
- Descaling the machine
- Changing the filter

Cleaning the machine

After 180 preparations or 80 switch-on rinses, the ENA will prompt you to clean it.

⚠️ WARNING

Non-recommended (e.g. liquid) cleaning agents may contain substances that could damage the machine or leave residues.

- Use only original JURA cleaning tablets. These are specially formulated for your machine.

⚠️ The cleaning program lasts approximately 15 minutes.

⚠️ Do not interrupt the cleaning program. The quality of cleaning will be impaired if you do so.

⚠️ JURA cleaning tablets are available from specialized dealers.

Precondition: Your ENA is ready for use. The Cleaning symbol 🚰 lights up.

- Turn the coffee spout to the ‘2 cups’ position.

⚠️ Touch the Cleaning symbol for approximately 2 seconds.

The Coffee Grounds Container symbol ⚠️ lights up.

- Empty the drip tray and coffee grounds container and reinsert them.

The Cleaning symbol 🚰 lights up.

- Touch the Descaling symbol to confirm that you want to set the water hardness to ‘level 3’.

Your ENA is once more ready for use.
Place a receptacle under the coffee spout.

Touch the Cleaning symbol. The \( \text{\ding{55}} \), \( \text{\ding{53}} \), and \( \text{\ding{52}} \) symbols flash, water flows out of the coffee spout. The operation is interrupted, the Ground Coffee symbol \( \text{\ding{15}} \) lights up.

Open the powder chute for ground coffee and drop in a JURA cleaning tablet.

Close the powder chute for ground coffee. The Cleaning symbol \( \text{\ding{52}} \) lights up.

Touch the Cleaning symbol. The \( \text{\ding{55}} \), \( \text{\ding{53}} \), and \( \text{\ding{52}} \) symbols flash, water flows out of the coffee spout several times. The operation is interrupted, the Coffee Grounds Container symbol \( \text{\ding{15}} \) lights up.

Empty the drip tray and coffee grounds container and reinsert them. The \( \text{\ding{55}} \), \( \text{\ding{53}} \), and \( \text{\ding{50}} \) symbols flash. The machine heats up. Your ENA is once more ready for use.

Cleaning the machine without a prompt: You can initiate the ‘Cleaning the machine’ operation manually at any time as long as the machine is ready for use. Touch the \( \text{\ding{55}} \) and \( \text{\ding{52}} \) symbols simultaneously for approx. 2 seconds. The \( \text{\ding{55}} \), \( \text{\ding{53}} \), \( \text{\ding{52}} \), \( \text{\ding{50}} \), or \( \text{\ding{15}} \) symbols light up brightly. Continue with the first prompt (indicated by \( \text{\ding{55}} \)) as described in this section.

Descaling the machine

The ENA builds up deposits of limescale over time and automatically prompts you to descale it when necessary. The degree of calcification depends on the hardness of your water.

**WARNING**

Non-recommended descaling agents (e.g. vinegar) may contain substances that could damage the machine or leave residues.

- Use only original JURA descaling tablets. These are specially formulated for your machine.

**WARNING**

Harmful and irritating descaling agent. Harmful if swallowed. Irritating to eyes and skin.

- Keep children AWAY.
- Avoid contact with skin and eyes.
- Avoid generation of dust. Do not inhale dust.
- After contact with skin, wash immediately with plenty of water. In case of skin irritation, seek medical advice.
- After eye contact, immediately flush eyes with plenty of water. Remove contact lenses. Seek medical advice.
- If swallowed, rinse mouth immediately and drink large quantities of water. Do not induce vomiting. Seek medical advice immediately and show label.

**NOTICE**

If the descaling operation is interrupted, there may be damage to the machine.

- Allow the descaling program to run to the end.

- The descaling program lasts approximately 40 minutes.
- JURA descaling tablets are available from specialized dealers.
- If you use a CLEARYL Blue filter cartridge and this is activated, you will not be prompted to descale.
If the descaling agent comes into contact with sensitive surfaces (e.g. marble), damage cannot be ruled out. Clean up any splashes immediately.

Precondition: Your ENA is ready for use. The Descaling symbol \[\text{\ding{192}}\] lights up.

- Touch the Descaling symbol \[\text{\ding{192}}\] for approximately 2 seconds.
  - The Coffee Grounds Container symbol \[\text{\ding{186}}\] lights up.
  - Empty the drip tray and coffee grounds container and reinsert them.
  - The Water Tank symbol \[\text{\ding{188}}\] flashes.
  - Remove and empty the water tank.
  - Completely dissolve the contents of one blister (three JURA descaling tablets) in a receptacle holding 17 oz (500 ml) of water. This may take several minutes.

- Pour the solution into the empty water tank and reinsert the tank.
  - The Descaling symbol \[\text{\ding{192}}\] lights up.
- Touch the Descaling symbol.
  - The \[\text{\ding{192}}, \text{\ding{188}}, \text{\ding{187}}\] and \[\text{\ding{189}}\] symbols flash, water flows directly into the drip tray.
  - The \[\text{\ding{192}}, \text{\ding{188}}, \text{\ding{187}}\] symbols flash, water flows out of the drip tray.
  - The operation is interrupted, the Coffee Grounds Container symbol \[\text{\ding{186}}\] lights up.
  - Empty the drip tray and coffee grounds container and reinsert them.
  - Your ENA is once more ready for use.

If the descaling operation stops unexpectedly, rinse the water tank thoroughly.

Descaling the machine without a prompt: You can initiate the 'Descaling the machine' operation manually at any time as long as the machine is ready for use. Touch the \[\text{\ding{192}}\] and \[\text{\ding{191}}\] symbols simultaneously for approx. 2 seconds. The \[\text{\ding{192}}, \text{\ding{191}}, \text{\ding{190}}\] and \[\text{\ding{189}}\] symbols light up brightly. Continue with the first prompt (indicated by \[\text{\ding{192}}\]) as described in this section.

Changing the filter

- After 2000 oz (60 liters) of water have flowed through, the filter will cease to work. Your ENA will automatically prompt you to change the filter.
- After three months, the filter will cease to work. Set the date on the date plate on the filter holder in the water tank.
- If the CLEARYL Blue filter cartridge is not activated in programming mode, you will not be prompted to change the filter.

Precondition: Your ENA is ready for use. The Filter symbol \[\text{\ding{193}}\] lights up.

- Touch the Filter symbol \[\text{\ding{193}}\] for approximately 2 seconds.
  - The Water Tank symbol \[\text{\ding{188}}\] lights up.
  - Remove the water tank.
  - Open the filter holder and remove the old filter cartridge.
Insert a new filter cartridge into the water tank, exerting slight pressure.

Close the filter holder. It will click into place audibly.

After three months, the filter will cease to work. Set the date on the date plate on the filter holder in the water tank.

Fill the water tank with fresh, cold water and reinsert it.

Descaling the water tank
Limescale deposits may form in the water tank. To ensure correct function of the machine, descale the water tank from time to time.

- Remove the water tank.
- If you use a CLEARYL Blue filter cartridge, remove it.
- Descale the tank with a mild conventional descaling agent in accordance with the manufacturer’s instructions.
- Rinse the water tank thoroughly.
- If you use a CLEARYL Blue filter cartridge, reinsert it.
- Fill the water tank with fresh, cold water and reinsert it.

Cleaning the bean container
Coffee beans may be covered with a slight oil film which remains on the walls of the bean container. These traces may negatively affect the coffee result. For this reason clean the bean container from time to time.

Press the On/Off button to switch the machine off.
- Disconnect the power plug.
- Remove the bean container cover.
- Remove the coffee beans with a vacuum cleaner.
- Clean the bean container with a soft, dry cloth.
- Fill the bean container with fresh coffee beans, then close the bean container cover.

Changing the filter without a prompt: If the filter is activated, you can initiate the ‘Changing the filter’ operation manually at any time as long as the machine is ready for use. Touch the • and ℹ️ symbols simultaneously for approx. 2 seconds. The •, ℹ️, 🚨 and 🔄 symbols light up brightly. Continue with the first prompt (indicated by •) as described in this section.

If you were unable to solve the problem, contact customer support in your country (see Chapter 11 ‘JURA contact details / Legal information’).
8 Transport and environmentally friendly disposal

Transport / Emptying the system

Keep the packaging for your ENA. It should be used to protect the machine during transport.

In order to protect the ENA from frost during transport, the system must be emptied.

Precondition: Your ENA is ready for use.

- Place a receptacle under the coffee spout.
- Touch the 🚥 and 🛫 symbols for approximately 2 seconds.
  The 🚥, 🛫, and 🚫 or 🚠 symbols light up brightly.
- Remove and empty the water tank.
  The 🚥, 🛫 and 🚫 symbols light up.

- Touch the Espresso symbol.
  Hot water will continue to flow until the system is empty.
  The Water Tank symbol 🚥 lights up.
- Press the On/Off button to switch the machine off.

Disposal

Please dispose of old machines in an environmentally neutral way.
